## **COMPANY PROFILE**

# TIGRE SOLUTIONS

## ABOUT US

Tigre Solutions was established in April 2009, with an owner that has a vast knowledge base and years of experience in packaging and specialized automation. With his focus being on designing and manufacturing packaging automation machinery for FMCG packaging applications, ranging from liquid filling machines to bottle capping machines, Tigre Solutions has been able to grow from strength to strength, since then.

Tigre Solutions works closely with customers to maximize efficiency and productivity by providing full consultancy, high-quality machinery, and standby technical support. Tigre Solutions also offer a wide range of services that include – Design, Manufacture, Integration, and Installation.

The company covers any industry where liquid filling is concerned. Whether your requirements are food, cosmetic, pharmaceutical, or chemical, we can design and manufacture equipment specific to your needs. Complete automation solutions are our forté. We are also equipped to assess, design, and manufacture specialized automation equipment.

## OUR MACHINERY

All Tigre Solutions' machinery is designed on a powerful 3D rendering software package, which offers you the opportunity to visualize the exact appearance of your machine before manufacture. It also gives us an extreme advantage in ensuring that all components and functionality of the equipment are above industry standards, and the equipment performs well above your expectations.

## TYPES OF MACHINERY

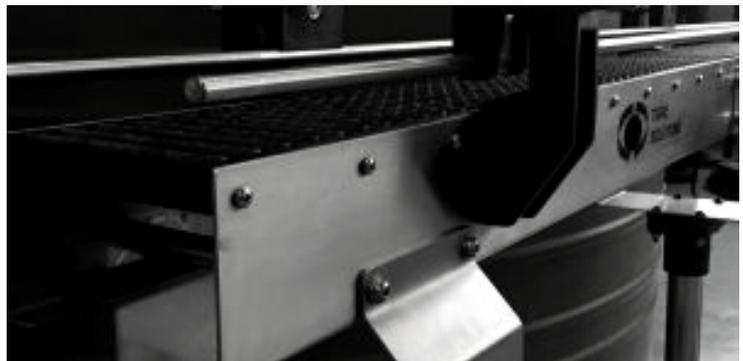

### LIQUID FILLING MACHINES

- Carbonation Filling
- Gear Pump Filling
- Gravity Level Filling
- Rotary Gravity Level Filling
- Weigh Filling

### CONVEYOR SYSTEMS

- Modular Chain Conveyor
- Roller Conveyor
- Tab Chain Conveyor

### LABELING MACHINES

- Over-head Bar Code Product Identifier
- Self-Adhesive Labeller

### BOTTLE WASHING MACHINES

### CAPPING MACHINES

### PACKING TABLES

### WADDING MACHINES

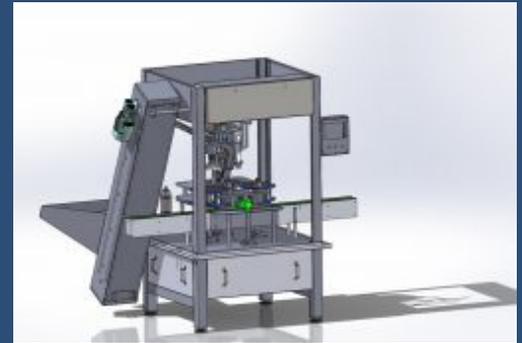

---

All machinery types have many options and will be offered to suit your needs, product and bottle styles. They range from basic table top, semi automatic models, to high speed, fully automatic lines.

## SERVICES

We are also fully capable of designing and manufacturing specialised equipment at your request. Tigre Solutions aims to be able to provide complete solutions from start to finish of packaging lines, and is always currently developing new types of equipment related to the packaging industry. Our machines are built with the intention of little or no maintenance by means of robust designs and the use of durable materials.

Some examples of our powerful CAD software below:

Tigre Solutions can refurbish and upgrade your existing equipment to improve the efficiency of your production. We can manage the entire project as follows:

- Un-Install existing equipment.
- Uplift equipment from your premises to ours.
- Refurbish and upgrade as per your request / quotation.
- Deliver and re-install the refurbished and upgraded equipment.
